

What makes our filters special?

pH - Value

The pH - Value is a measure for the acidity

The higher the proportion of minerals in the water, the higher the pH.

With Aguaris drinking water filter preserving the essential minerals.

Minerals act as a natural acid buffer in our body

pH-Value	ambit
6,9 - 0	sour
7	neutral
7,1 - 14	alkaline - basic
7 > 9	Mallorca Water

Alkaline water has a particular effect:

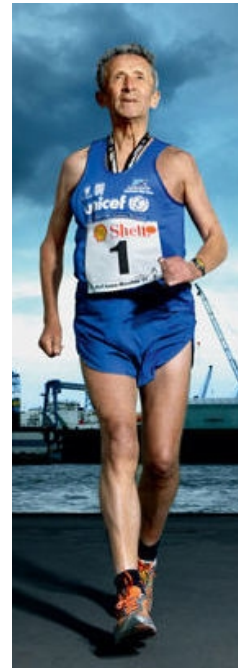

- Antioxidant effect
- Helps to neutralize free radicals
- Harmonization of the acid-base balance
- Removal of waste products
- Supports healing processes in the body

! We need healthy water to stay healthy !

Ionization

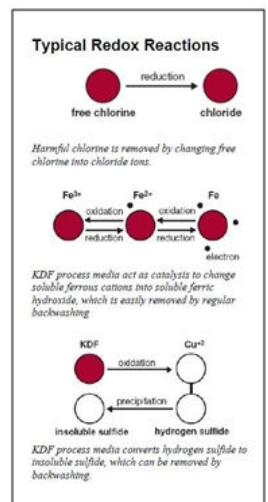

Electrons are a physical form of energy.

- Well being
- Life energy
- Vitality
- Power

Ionization takes place by redox reaction.

This is an electrochemical reaction, by KDF® agent wherein a reactant electron transmits to the other.

Water with electron-deficient = acidic environment

With a loss of energy or electron deficiency the body does not absorb water

Water rich in electrons = Alkaline environment

With energy loss or electron-deficiency the body uses the water as a power supply
